

## MODEL MTO 5060

Proper to cut a horizontal furrow under the plan it extracts with a speed of cut from 0 ÷ 25 m/min.  
Slide on binary type T 60  
Total power Kw 41,5  
Depth of Horizontal cut max 250mm.  
Height cut (from the plan it extracts) max. 420 mm.  
Horizontal disk  $\varnothing$ 700mm..  
Recommended generator KVA 75

## ELECTRIC MOTORS

- Horizontal cut kw 37  
Type IP 55 Class F  $\eta$  0, 87÷ 0,92V 380 50 Hz B3
- Advancement Kw3  
Type IP 55 Class F  $\eta$  0, 750÷ 0,92V 380 50 Hz B5
- I install hydraulic Kw1,5  
Type IP 55 Class F  $\eta$  0, 75÷ 0,92V 380 50 Hz B5

## ELECTRIC PICTURE

With commands of driving to low tension as foreseen by the law  
Opportunely proportionate and pulsating of march / single arrest for every motor.

## SAFETY

The machine is provided of electric devices of block that make her/it sure and of acoustic and bright device that warns that the cars it is in movement. And' provided of protections on all the mechanical organs in movement and protection on the disks up to maximally possible.

## I INSTALL HYDRAULIC

Pomp to gears. distributor to 2 elements  
Brought 8 litri/1'  
Pressure 100 ÷ 150 bar  
Ability reservoir 40Lt.

## ADVANCEMENT OF CUT

Hydraulic to varying course  
independent operated through lever  
inversion of march with point of madman  
speed max. 40m/min. 4 to empty  
4 wheels engines

## LOOM

It structures in steel on purpose studied for a' tall resistance, elettrosaldato. Translation cart Horizontal loom through martinetto to double effect  
And it flows on pads and adjustable guides to annul the game of usury. Driving Horizontal cut through hydraulic martinetto to double effect  
integrated in a system of levers.

## Measure and Mass

Width 1900 mm. ~  
Lenght 1100 mm. ~  
Height 1650 mm. ~  
Weigth 1400 Kg. ~

Gives technical and characteristics can suffer variations
